

AXIOM

DIMENSIONAL LETTERS

Design

We either produce a layout based on your measurements and photos or we follow your architectural specifications.

Fabrication

We carefully rout, laser-cut, or water-jet cut or form your lettering and logos as the job requires out of MDF, wood, foamboard, pvc, acrylic, aluminum or steel. We can finish in many ways from pantone matched painting to polishing or brushing for metal, or we can apply a digitally printed face.

Professional Installation

We measure, level, and tape paper pattern in place. Then we drill holes, or mark wall for letter placement. Finally, we glue, tape or insert studs as job requires.
